Dear Community Connectors Grant Review Committee,

As a proud member of the Pensacola City Council, and a lifelong resident of this wonderful city, I'm writing to you today to express my support for the Bluffline project.

This 10-mile greenway would stretch from Scenic Heights to West Pensacola, running right through East Pensacola Heights, in the heart of my District. If successful, this project would offer my constituents a safe and accessible path to economic opportunities, cultural amenities and essential services in Downtown Pensacola.

The Bluffline vision aligns perfectly with my own commitment to smart growth and sustainable development. By improving transportation safety and accessibility, the proposed greenway would do more than just create a physical space for recreation. It would contribute to the overall well-being of our residents and stimulate our local economy by boosting our tourism sectors. That's smart growth, plain and simple.

In my role as a City Council Member, my primary aim has always been to ensure that District 3 gets the attention it deserves. The Bluffline project does exactly that by providing a unique opportunity for our district to shine. I'm thrilled to support this project, and I urge you to do the same.

With your help, I truly believe that the Bluffline project can redefine Pensacola, delivering real benefits to our residents and all who visit.

Thanks for considering this game-changer for our community.

Best,

Casey Jones
Pensacola City Council Vice President, District 3
